

Greening Ballarat through local water management: A green-blue city action plan

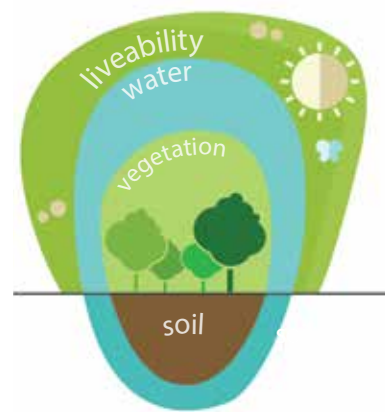

Image from Norman Creek 2026 - Vision and Concept Plan, Brisbane City Council

City of Ballarat would like to invite you to a workshop share your insights and knowledge.

A greener Ballarat, with healthy trees, gardens and parks will deliver many benefits to communities. There are excellent opportunities to support greening through local stormwater management by providing water to plants while also protecting our waterways and reducing urban runoff. City of Ballarat is developing an action plan and scoping possible future projects that will deliver these dual outcomes.

The workshop will set a vision for future activities and identify Ballarat specific opportunities for integrated delivery of greening and water management.

When: Wednesday 15th April, 9.15am - 12.30pm followed by lunch

Where: Trench Room, Level 1, Ballarat Town Hall

RSVP: quentongay@ballarat.vic.gov.au by 10th April
